Return **BRENDA JONES** DEMOCRAT 13th Congressional District

Brenda Jones

Dear Resident
of the 13th
Congressional
District,

My name is
Brenda Jones.
I am the former
Congresswoman
and current
President of the
Detroit City Council.

Two years ago, I ran simultaneously for both the partial and full congressional terms. Many voters informed me that they were unaware and confused that they needed to vote for me **twice**.

As a result, I was elected to Congress to complete the Late, John Conyers' term. However, I lost the full term election by approximately 900 votes.

Over time, I have paid close attention to the treatment that the citizens of the 13th Congressional District have received from the Federal Government. **The 13th Congressional District is one of the poorest districts in the United States. With its high rate of unemployment, infant mortality and poverty, citizens of the 13th need an experienced leader.**

Currently, we are facing a devastating crisis that has never been seen before in our lifetime. The COVID-19 has affected millions of people around the world, with approximately 300,000 people that have died from this disease. In the United States alone, more than 1.5 million people have tested positive for COVID-19, with a death rate of around 90,000 – and counting. **In the 13th Congressional District, the people affected and dying from this virus are among the highest of any region in America.**

Many people who have died with COVID-19 symptoms were never tested. There are hundreds of dead bodies still in refrigerated trucks at hospitals, overcrowded morgues and funeral homes. How could this happen?

Just like you, I have friends and close family members that have been sickened and even died from this highly contagious and deadly virus. I also tested positive for COVID-19 and was quarantined for several weeks. By the Grace of God, I never experienced many of the worst symptoms.

Why are black and brown people dying at disproportionately higher rates than other ethnic groups in the 13th District and across the country? Why was the Federal Government so woefully ill-prepared to fight this dreaded disease?

Did our Congressperson rely on President Donald Trump who is not a respecter of science or his own country's intelligence services and reports? The President has the ultimate responsibility to protect the United States from enemies, both foreign and domestic. COVID-19 is an enemy, this is a war, and President Trump is the absentee Commander-in-Chief.

Did your current congressperson know in February, that this virus was highly contagious and very deadly? Was anything done at that time to inform the people? This is the reason that I am running as your Democratic candidate for Congress in the 13th Congressional District.

If elected, I will always put the residents of the 13th Congressional District in a position to better protect themselves. I will do this by building effective coalitions with the Speaker of the House, the Congressional Black Caucus, as well as various federal agencies, such as FEMA, Health and Human Services, Homeland Security, the Department of Housing and Urban Development and the Department of Treasury.

Congress recently appropriated \$3 trillion dollars as part of a massive stimulus program. **More than \$500 billion dollars has been made available for small business loans and grants. The sad thing is many of the small and minority owned businesses will never receive a dime. THIS IS A TRAVESTY!**

We need effective representation and we need it NOW!!! Our congressional delegation needs to bring the money home to help Detroit, Highland Park, Ecorse, River Rouge, Inkster, Westland, Romulus, Dearborn Heights, Garden City, Melvindale, Redford Township and Wayne.

As the former President of Local 4004 Communication Workers of America, I am Union. Many rank and file union members are concerned about their future. They know many workers are being laid off and furloughed. Families are afraid that their jobs may never come back.

I am in this fight with you! Please vote for me, Brenda Jones, Democrat for Congress on Tuesday August 4, 2020.

Please be sure to follow all the rules put forward by the State, County and various cities that you live in. Be sure to wear your masks and gloves when you leave home.

Stay Safe and practice social distancing.

God Bless you.

Sincerely, Brenda Jones

Brenda Jones
Democratic Candidate for the 13th Congressional District
